***Minimum time required does not mean “standard” or “average” time required between promotion tests. The minimum time has been established so instructors do not send even the most exceptional student before the allowed time has elapsed. The “standard” or “average” time for studying at each Kup is determined by the individual instructor. The instructor is the only one who knows how much actual time has been spent working on Taekwon Do. The “standard’ or “average” time should be greater than the minimum time and cannot be less than the minimum time.**
